# HIGH QUALITY PRINTING DOWN FRAMES

## *For ultimate speed and accuracy*

MONTAKOP with cabin

- NOVA or RAPID Exposure Lamp Systems For maximum performance.
- TURBOSPEED Vakuum System Eliminates air pockets ensuring optimum contact.
- KR-Computer With 72 Programs Allows for constant intensity control.
- ALTERNATIV MODELS Metal Cabin or Automatic Safety Curtain Enclosure.

MONTAKOP printing down frames. Are top quality, high performance, user friendly units, offering lifetime reliability. THEIMER has evaluated customers requirements worldwide, resulting in equipment constructed without compromise.

The new TURBOSPEED vacuum system is a further improvement in speed and quality of vacuum. Together with the uniform lighting of

the THEIMER NOVA lamp system superb results are ensured with large format full page films.

The NOVA lamp system with low stand-by power facility of only 25 % power consumption, provides for an even light distribution to ensure uniform coverage. For the low volume production user RAPID Instant Start System, offers even greater economy.

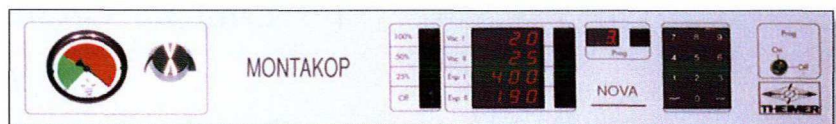

With these systems there are lamps available from 3 Kw to 8 Kw used in conjunction with several formats from 65 x 84 cm up to 135 x 170 cm. Suitable for most popular plate sizes used in the graphic arts field.

The THEIMER KR-Computer automatically compensates all exposures for lamp ageing, line voltage fluctuations, and exposing through proofing filters.

The automatic diffusion foil, plus TURBOSPEED vacuum system, KR-Computer, optimised light source, useful drawer storage unit, and last but not least, the overall construction quality, guarantees many years of trouble free service in operation.

MONTAKOP with curtain

User panel with vacuum meter switch for 3 power levels, KR-Computer and LED display
