# SPEKTRA PROOF-S

*The compact class in printing down frames*

*SPEKTRA PROOF S*

- NOVA Copylamp with 3 power levels and low stand by power.
- KR-Computer with 72 programs and photo cell for automatic light integration.
- TURBOSPEED vacuum system for always best vacuum.
- Automatically working diffusion foil.
- Less space requirement due to compact design.
- Great value.

SPEKTRA-PROOF-S are printing down frames for Offset plates with flip top vacuum frame. Available in version SPEKTRA-PROOF-S with one frame and with double sided vacuum frame called SPEKTRA-PROOF-SD this unit provides best solution for most users.

*User panel with vacuum meter, switch for 3 power levels, KR-Computer and LED display*

The SPEKTRA-PROOF-S units can be offered with copy lamps of 1 kW, up to 6 kW and frame sizes of 65 x 75 cm, 80 x 100 cm and 95 x 115 cm.

The NOVA lamp system with low stand by power of only 25% provides an even light distribution.

The KR-COMPUTER with 72 working programs allows fast access to all options of program. At the units with double frame there is a separate computer for each frame so the SPEKTRA- PROOF-S can work extremely fast.

TURBOSPEED the new generation in vacuum systems for best vacuum also at work with full page film and the automatic diffusion foil makes the SPEKTRA-PROOF-S a real friend to all users.

A special safety device ensures that there is no way for double exposure or exposure while the vacuum frame is not locked properly.
