Our contribution to environmental protection: Old lamps are properly disposed of for our customers, free of charge.

You know the situation. Hectic, deadlines and just then it happens. The lamp fails and there is no replacement available.

We don't have to explain what that means. Machine stoppage, annoyed customers, unnecessary costs etc.

Don't let it go so far. Keep at least one lamp in reserve.

But if it does happen, just call us. And we will deal with your order fast and efficiently.

As manufacturers we have a large stock of all the common lamp types for repro cameras, contact copiers and UV curing applications.

INQUIRY FOR LAMP

Type (from the socket or on the packing)
